

# DEIS – State Diploma in Social Engineering

(French *Diplôme d'Etat d'Ingénierie Sociale*)

## Profession

This training is intended for professionals who already have demonstrated experience in health and social work and who want to work in supervisory positions in the broadest sense.

The DEIS trains professionals demonstrating the necessary skills for positions of expertise, counselling, design, development and assessment applied to the areas of social policies and social interventions.

The social engineer is able to use exploit his/her professional experience and inter-disciplinary knowledge in order to take into account different public policies, to analyse and study social issues, to question policies and initiatives, to put forward and implement complex programmes or projects.

## Duration of training

This is a 3-years programme.

## In-class training

700 hours of classroom teaching includes the following three areas of competence:

- \_ DC1 DF1: Knowledge creation = 300 hrs.
- \_ DC2 DF2: Design and implementation of initiatives = 250 hrs.
- \_ DC3 DF3: Communication, human resources = 150 hrs.

A double degree may be combined with the following:

- a Master 2 University course of student's choice

“Conflict resolution in the public domain”

“Urban social development and public initiatives” in partnership with the University of Versailles Saint-Quentin-en-Yvelines

- a Master 2 CNAM

“Work and Social Sciences, Human Resources and Sociology” in partnership with the Paris CNAM

## Hands-on training

This programme comprises 175 hours of field study (5 weeks). This “field study” is integrated with DC2 “Design and implementation of initiatives”.

## Contacts

This training is intended for field professionals. It is provided in the context of continuing professional training.

- Conditions for reduced training requirements can be discussed with the Department Manager:
